BBVA – Innovation 4 Security
Miguel.hernandez @i4s.com – Twitter: @i4ssecurit

Ingeniero en Telecomunicaciones por la universidad de Zaragoza (UNIZAR) y Máster en Ciberseguridad por la universidad Carlos III de Madrid (UC3M).

Analista de seguridad Informática. Amante de CTFs, programación e IA.

Ha invertido los últimos años de su carrera profesional en multinacionales españolas, como Telefónica o BBVA (i4s), en investigación e innovación de nuevos procedimientos de detección de fraude, thread intelligence y seguridad defensiva.

Actualmente trabaja en el sector bancario aplicando tecnologías de Natural Language Processing, Deep Learning y graph databases. Ha sido premiado con diferentes reconocimientos por su trabajo en estas disciplinas: Accesit y Finalista – III / IV Concurso de Jóvenes Profesionales ISACA, ganador del Sinfonier Contest 2015 (Telefónica). Conferencias: RootedCon, Mariapitadefcon, JNIC, Secrypt...

Def: Social media is the collective of online communications channels dedicated to community-based input, interaction, content-sharing and collaboration.

CENSORSHIP

WORLD

CHINA EXTENDS INTERNET CRACKDOWN WITH BAN ON CELEBRITY GOSSIP

BY ELEANOR ROSS ON 6/13/17 AT 5:46 AM

Saudia Arabia leads Arab regimes in internet censorship

RONI JACOBSON BACKCHANNEL 04.12.17 12:00 AM

INTERNET CENSORSHIP IS ADVANCING UNDER TRUMP

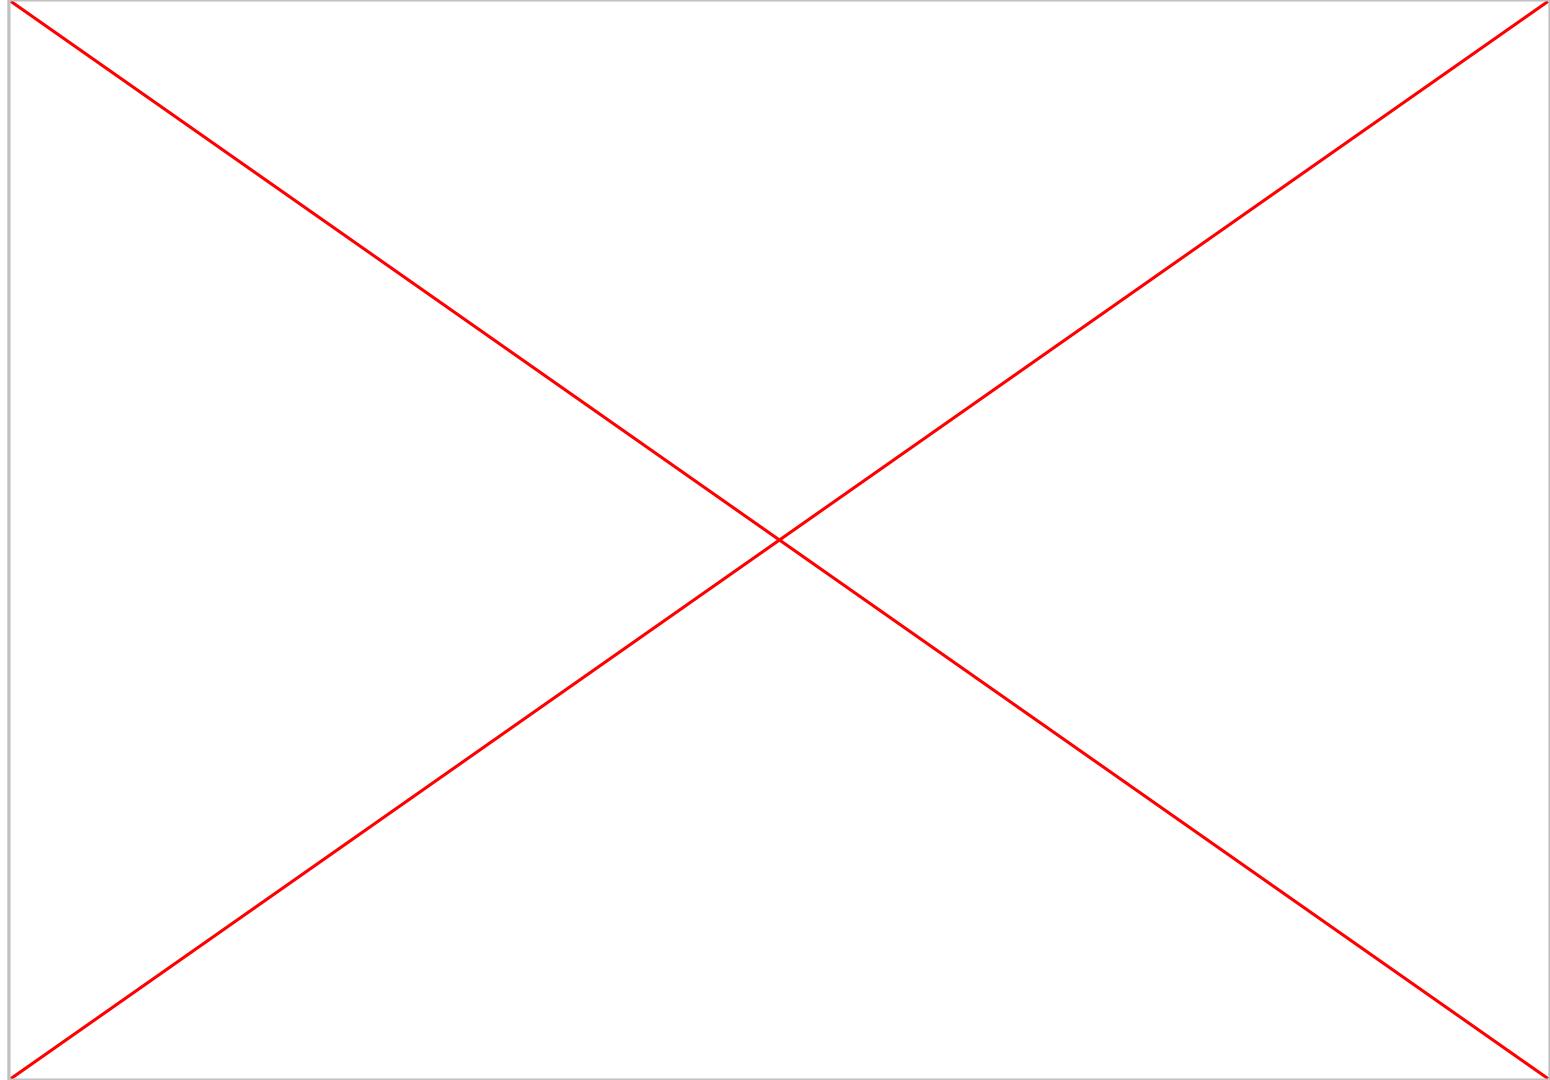

The screenshot shows the homepage of onlinecensorship.org. At the top, there's a navigation bar with links for 'ABOUT', 'RESOURCES', 'SUBMIT REPORT', and language options ('EN'). Below the header, a large question 'Has your photo been taken down?' is displayed, with a 'SUBMIT YOUR REPORT' button next to it. A dark blue sidebar on the left contains the text 'WHAT IS ONLINE CENSORSHIP?' and a brief description of the site's purpose. The main content area features several stories: one about a man in prison for 15 years for a video, another about a profile being banned in Ethiopia, and a third about a person named AKA Happy being censored in Ethiopia. There are also sections for 'STORY' and 'READ THE STORY'.

CENSORED

- Emiratos Árabes Unidos
- Pakistán
- Malasia
- Siria
- Uzbekistán
- Bangladesh
- Vietnam
- Irán
- Libia
- China
- Túnez
- Turquía
- Turkmenistán

Tumblr's down, but not out

by Todd Wasserman
February 22, 2016

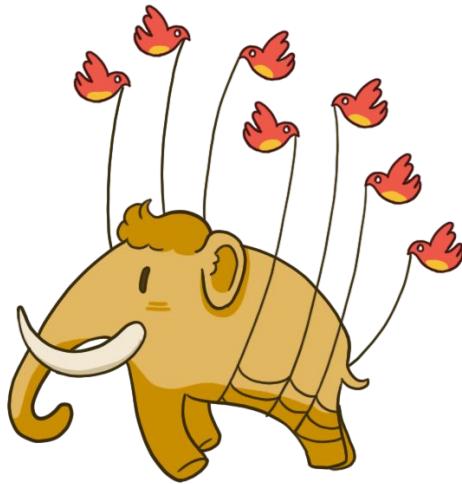

The Intersect

What the Internet loses when Vine shuts down

- Less time spent developing content
- Less time spent consuming individual pieces of content
- The opportunity for more frequent posts
- An easier way to share urgent or time-sensitive information

ALFONSO REDES SOCIALES USOS

- Fully interoperable with GNU social and any OStatus platform
 - Real-time timeline updates
 - Media attachments like images and WebM
 - OAuth2 and a straightforward REST API
 - Background processing for long-running tasks
 - Deployable vía Docker

The screenshot shows the Mastodon mobile application interface. At the top, there's a navigation bar with icons for home, search, and account. Below it is a header bar with a search field and a magnifying glass icon.

Mastodon is open source software. You can contribute or report issues on GitHub at [tootsuite/mastodon](#). Various apps are available.

Bottom right corner illustration: A cartoon illustration of an elephant's head with a small paper airplane flying out of its trunk.

Technologies

Activity Streams is an open format specification for activity stream protocols. Implementors of the activity Activity Streams draft include →

Salmon protocol aims to define a standard protocol for comments and annotations to swim upstream to original update sources -- and spawn more commentary in a virtuous cycle. It's open, decentralized, abuse resistant, and user centric.

WebFinger is a protocol specified by the Internet Engineering Task Force IETF that allows for discovery of information about people and things identified by a URI.

WebSub (formerly **PubSubHubbub**) is an open protocol for distributed publish/subscribe communication on the Internet.

social.targaryen.house

social.targaryen.house is one of several mastodon instances in the fediverse. It aims to be an alternative choice, and it will federate with other instances.

Fire and Blood!

LGBT.io

Mastodon is a [free; open-source](#) social network. A [decentralised](#) alternative to commercial platforms, it avoids the risks of a single company monopolising your communication. [LGBT.io](#) is one of the Mastodon instances out there. Once signed up, you can interact with members on the same instance and everyone else in the fediverse! We welcome all LGBT+ people and allies all around the world! Be friendly. Be happy. Be safe. :-)

w3c.social

For people involved in the activities of the World Wide Web Consortium (W3C), in Working Groups or Community Groups, and people who follow the work of the W3C. Run on a volunteer basis by Sandro Hawke and others, NOT the W3C systems team, and NOT supported by W3C. Uses the [W3C Code of Ethics and Professional Conduct](#). A place to talk online about the things you would talk about in a meeting, or at a meal with your group. We plan to have a relay-bot soon, so don't feel like you need an account here to be a member of this online community. Please post things you think the W3C community might find interesting!

VERSION

anitwitter.moe

Anitwitter.moe is a-meme focused on providing a community free of overbearing moderation, censorship, and other bullshit that the big social media platforms do. Still being tested, expect the site to go down on occasion.

If you have not received a confirmation email yet, check your spam folder, then join our [discord server](#) and ask in the #anitwitter_dot_moe channel for help with manual account confirmation. The big email providers have blocked us from sending out so many confirmation emails, and they are almost done reversing the blacklist.

Bored of this interface? Try out [tanitwitter.moe](#), it lets you use multiple accounts and has a more tweetdeck-like style. We are working on deploying the twitter

kink.family

Welcome to Kink.Family, a mastodon instance for kinksters of all types. This instance does not federate to other mastodon servers, so things you post here are semi-private. Semi-private, because someone could still go to your profile or status page directly. We are a welcoming community, heavily moderated against those who aren't [following our rules](#).

Note: This server specifically does not mandate putting kinky or sexual content behind a CW, but images must go behind a CW.

Sadly, some maintenance recently went bad and you may need to re-create your account. I'm so sorry.

@ckeen I don't think moving old posts make sense. If you really care, make your first post an explanation so that future archeologists can follow the trail. Authentication: if your current account posts a note saying follow me at X and people trusted the old account and both the old and new infrastructure, there's no problem. And that's how you do it: leave a good bye/redirect message and go. Or keep both accounts running for a while.

**DEMO INSTANCIA EN
TIEMPO REAL**

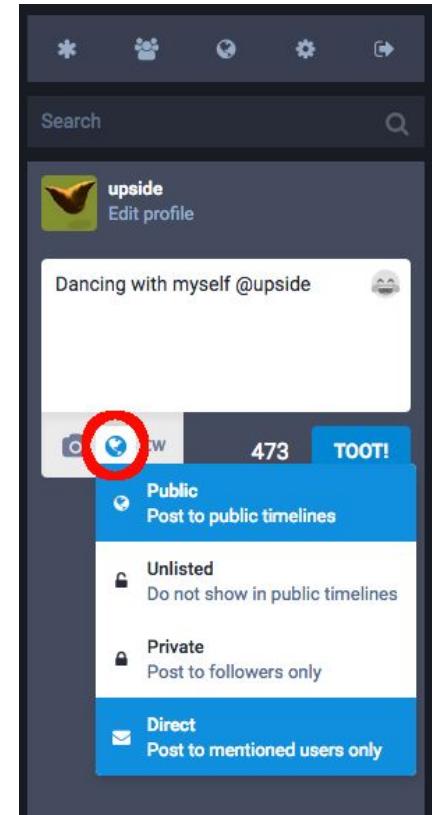

Toots

- With 500 characters at your disposal and support for granular content and media warnings, you can express yourself the way you want to.

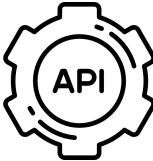

What does "Adjust Status Privacy" mean and how does it work?

The globe icon under the toot area adjusts your status privacy by changing who can see your posts. This is what happens:

Privacy setting	Broadcasted to	Viewable by	Notes
Public	Global, public timelines	Everyone	Federated. People on other instances will probably see it.
Unlisted	Followers only	Everyone	Can be boosted and thus seen on other instances.
Private	Followers only	Followers only	Cannot be boosted.
Direct	Mentioned people only	Mentioned people only	Similar to email

Feed Local vs Feed Federated

Timelines

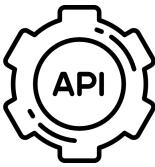

Retrieving a timeline:

```
GET /api/v1/timelines/home  
GET /api/v1/timelines/public  
GET /api/v1/timelines/tag/:hashtag
```

Query parameters:

Field	Description	Optional
<code>local</code>	Only return statuses originating from this instance (public and tag timelines only)	yes
<code>max_id</code>	Get a list of timelines with ID less than this value	yes
<code>since_id</code>	Get a list of timelines with ID greater than this value	yes
<code>limit</code>	Maximum number of statuses on the requested timeline to get (Default 20, Max 40)	yes

Note: `max_id` and `since_id` for next and previous pages are provided in the `Link` header. However, it is possible to use the `id` of the returned objects to construct your own URLs.

Text Mining

The screenshot shows a Mastodon mobile application interface. At the top, there are two tabs: 'mastodon.social/web/statuses/14341351' and 'mastodon.social/web/statuses/1'. Below the tabs, there's a header with a profile picture, the name 'Eugen', and the handle '@Gargron'. The main content area displays the status 'Hello world' with the timestamp '16 mar. 2016 15:44'. Below the status are interaction icons: a reply arrow, a retweet arrow, a star, and three dots.

```

+

This is not something that can be fixed by mastodon (the proposition to make the name of the instance more visible can be opened in another issue, and all the other suggestions are basically to use another service and identify there). Therefore, I'm closing this issue

2 1

wxcafe closed this on 13 Apr

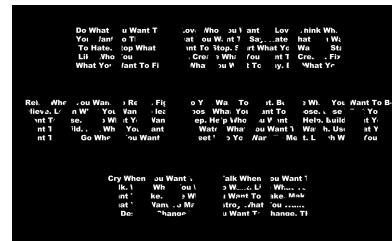

How do I get verified with a “”?

" is an emoji, only for lulz. There is no verification on Mastodon. You can copy and paste "" into your bio if you wish, you cheeky monkey.

How do I prevent people from impersonating me?

Because anyone can create a username on any instance, it is impossible to prevent others from using the same username on another instance. Some people have taken to running their own single-user instance to verify themselves, or use [Keybase](#).

COMMAND AND CONTROL

Conclusion

1. The future is non-commercial social media.
2. A good approach is decentralized
3. Security is problem also with open-source alternatives, not only with big companies.
